

**ELECTRIC SERVICE SCHEDULE NO. 114 - Continued**

**DESCRIPTION:** (continued)

The System may be operated on consecutive days, but will not be operated to control a Customer's load for more than a total of 100 hours during the summer peak period (June 1 through August 31).

**CUSTOMER PARTICIPATION:** Customer participation is voluntary and is limited to qualifying customers within the Control Signal Area. Customer participation is initiated by contact with the Cool Keeper Call Center. This Call Center is operated by the Contractor. A 'Participant' is defined as an eligible Rocky Mountain Power customer who indicated their intentions to participate in the Program, who has a load control device installed at their premises and is fully readied to receive 'Dispatch Events'.

(C)  
(C)

Participants that relocate within the Control Signal Area will have their program enrollment continued without interruption if the participant's new premises is equipped with a qualifying air conditioning unit(s). Relocating participants whose new premises is equipped with a qualifying air conditioning unit(s) will be provided with an enrollment continuation kit that includes information on their continued enrollment. Where a participant's new premises is equipped with an existing load control device, that device will be reactivated within the program's established scheduling process. Where a participant's new premises is not equipped with a load control device, installation of a device will be coordinated in keeping with the program's established scheduling and installation process. Relocating participants will maintain the right to opt-out of the program at any time of their choosing as described below

(N)

Non-participating customers that relocate to a Control Signal Area premises equipped with an existing load control device will be enrolled in the program after being provided with a program welcome kit and the expiration of a four week opt-out period. Upon moving in to a Control Signal Area premises, non-participating customers will be provided with a program welcome kit. The program welcome kit will include information about the Cool Keeper program and instructions on how to opt-out of program participation. Upon the expiration of a 4 week opt-out period, non-participating customers will be automatically enrolled in the program and the load control device will be reactivated. The four week opt-out period will begin on the day the Company sends out the program welcome kit. Reactivation of the device will occur within the program's established scheduling process.

(N)

During the summer peak period participating customers may request to opt-out of no more than two (2) 'Dispatch Events' by contacting the Cool Keeper Call Center. Customers contacting
