**Re: Permitting Update
Milford Wind Corridor (Docket No. 08-2490-01)**

Dear Commissioners:

On October 8, 2008, the Public Service Commission of Utah (“Commission”) issued its Report and Order in the above referenced docket (“Order”), granting Milford Wind Corridor Phase I, LLC (“Milford Wind”) a Certificate of Convenience and Necessity (“Certificate”). Pursuant to the Order, Milford Wind hereby provides the Commission with the following information about the status of its permitting efforts, the construction schedule and the in-service dates for the certificated facilities.

In previous submissions to the Commission, Milford Wind provided information about permits that were required (or potentially required) for Milford Wind to construct the wind farm and the power line interconnecting the wind farm to the switchyard at the Intermountain Power Project (the “Line”). Given the Commission's ruling that only construction of the Line, and not the wind farm, would require the Certificate, and in light of the Order granting the Certificate, this update is limited to information about the status of the Line.

As of the date of this letter, all material permits necessary for construction of the Line have been obtained, including the following:

- BLM FONSI, Decision Record and Rights-of-Way
- ACOE CWA Sec. 404 Fill Permit, Nationwide 12 (Utility Line Activities)
- UDEQ, UPDES Construction Stormwater Permit
- UDOT Highway Encroachment/Crossing Permits
- Beaver County Conditional Use and Building Permits
- Millard County Conditional Use and Building Permits

Commission Chairman Ted Boyer
Commissioner Richard M. Campbell
Commissioner Ron Allen

Page Two

With the permits now in place, construction of the Line has commenced. The information currently before the Commission gives a planned in-service date of March 31, 2009. After experiencing some measure of delay, however, and after a revision of Milford Wind's contractual deadline for delivering power, Milford Wind now anticipates that the Line will be completed and in service by December 31, 2009.

In accordance with the Order, Milford Wind will report any significant changes in the construction schedule or in-service date as that information becomes available to Milford Wind.

If you have any questions about the content of this letter, please contact me.

Very truly yours,

Milford Wind Corridor Phase I, LLC

/s/
