Re: Status Report -- Milford Wind Corridor (Docket No. 08-2490-01)

Dear Commissioners:

Pursuant to the Order of the Commission issued on October 8, 2008 in the above-referenced docket, Milford Wind Corridor Phase I, LLC ("Milford Phase I") provides the Commission with the following information about the development of the second phase of the wind project located in Millard and Beaver Counties.

On March 1, 2010, Milford Wind Corridor Phase II, LLC ("Milford Phase II") and SCPA signed a wholesale Power Purchase Agreement, which provides that Milford Phase II will deliver the entire 102 MW output of its generation facility to SCPA. As with the power from Milford Phase I, the output of Phase II will be consumed by customers of SCPA-affiliated municipalities in Southern California. None of the power from Phase II will be available to Utah consumers.

Milford Phase II has closed the financing for the Phase II wind farm, and construction is underway. We anticipate that the plant will begin commercial operation in April, 2011.

Milford Wind will keep the Commission informed as to those matters identified in the Order. If you have any questions about the content of this letter, please contact me.

Very truly yours,

MILFORD WIND CORRIDOR PHASE I, LLC
