Commission Secretary

Re: Demand-side management reports pursuant to Commission order in Docket No. 09-035-T08 regarding Phase I issues

On August 25, 2009, the Commission issued its order in the above referenced docket approving the Phase I stipulation agreed to by parties and filed with the Commission on August 3, 2009. As specified in the stipulation, Rocky Mountain Power is required to provide to the Commission and Demand-Side Management Advisory Group on a semi-annual basis a balancing account analysis similar to that originally provided by the company in Advice No. 09-08. The attached spreadsheet entitled "UT DSM Balancing Account Analysis\_November 2009" contains the first submission of this report. As demonstrated by the attached report, it is projected the current DSM tariff rider administered through Schedule 193 remains on track to balance the Utah DSM deferred account by August 2011.

The stipulation also requires the company to provide to the Commission and Demand-Side Management Advisory Group a forecast of expenditures for approved programs and their acquisition targets (in MWh and MW) for the next calendar year. A report containing the forecast of these items for calendar year 2010 is provided in the attached spreadsheet entitled "UT DSM Projected Expenditures and Savings\_Calendar Year 2010."

An original and five (5) copies of each report are provided with this filing.

It is respectfully requested that all formal correspondence and staff requests regarding this matter be addressed to:
