Re: DO NOT REDOCKET
Advice No. 09-03
Schedule 135, Net Metering Service

Enclosed for filing are an original and two copies of proposed tariff pages associated with Tariff P.S.C.U. No. 47 of Rocky Mountain Power applicable to electric service in the State of Utah. Pursuant to the requirements of Rule **R746-405-2D**, Rocky Mountain Power (the "Company") states that the proposed tariff sheets do not constitute a violation of state law or commission rule.

In compliance with the Commission's order issued in Docket No. 08-035-78 on February 12, 2009, the Company submits the proposed net metering service rates using the FERC Form No. 1 method for valuation of net excess generation credits for large non-residential customers. As required by page 24 of the Commission order, the method of calculating an average retail rate from the Company's FERC Form No. 1 was reviewed by interested parties during a technical conference on April 29, 2009. During the technical conference, no issues were raised with the Company's results or methodology. Also provided with this filing is Exhibit 1, which shows the calculation of the average retail rate credit prices for large non-residential customers. The Company will also provide an electronic version of this filing to tbehr@utah.gov. The Company respectfully requests an effective date of July 1, 2009.

Second Revision of Sheet No. 135-3	Schedule 135	Net Metering Service
First Sheet No. 135-4	Schedule 135	Net Metering Service
