STATE OF UTAH**

Self-Direction Credit

PURPOSE: To allow customers to self-direct Schedule 193 DSM Cost Adjustment charges into cost-effective demand side management (DSM) projects within their own facilities.

APPLICATION: This Schedule shall be available to an Eligible Customer ~~subject to a DSM Cost Adjustment charge pursuant to Electric Service Schedule No. 193~~ in accordance with the terms and provisions specified herein.

A customer with multiple meters measuring usage at facilities, one or more of which will be involved in a DSM Project, may aggregate the loads at those facilities to meet minimum usage requirements to qualify as an Eligible Customer, ~~so long as the A DSM Project for the aggregated facilities is submitted to the Self-Direction Administrator for pre-qualification or qualification shall be submitted~~ as a single project. Customers who become Eligible Customers through aggregation of meters must bear any incremental costs and expenses incurred by the Company and the Self-Direction Administrator in excess of the average costs and expenses incurred in connection with customers who are Eligible Customers without consideration of aggregation.

TERM: The term of this Self-Direction Credit shall be coterminous with the DSM Cost Adjustment provided in Schedule 193 ~~or any successor or other process for recovery of DSM costs from an Eligible Customer, both of which will expire automatically, absent a Commission order extending the term, on March 31, 2014.~~

DEFINITIONS:

Commissioning: The process of verifying and documenting that the performance of an electric energy usage system meets the design intent and Owner's operational requirements. The Self-Direction Administrator may require a Commissioning plan be submitted for projects seeking Pre-Qualification. Completed Projects may be required to provide a Commissioning report that verifies the operational parameters and electric energy savings resulting from an Eligible Project.

Efficiency Criterion: A projected Payback Period (or average Payback Period for projects submitted as a package) of between 1 and 5 years. The Self-Direction Administrator may utilize an alternative Efficiency Criterion for a project with a projected Payback Period in excess of five years that is demonstrated to the

satisfaction of the Self Direction Administrator to provide system benefits and to satisfy the Commission’s approved cost-effectiveness tests.

Eligible Customer: A customer with a peak load of 1,000 kw or annual usage of 5,000,000 kwh or greater within the prior 12 months at a single meter or at meters that are aggregated. Customers constructing new facilities are eligible if at the Company’s sole discretion, the estimated electrical usage at a single meter or meters that are aggregated is greater than or equal to 1,000 kw or 5,000,000 kwh during the first 12 months of operation.

Eligible Expenses: All actual expenses reasonably incurred by an Eligible Customer in connection with the construction, installation or implementation of an Eligible Project, including but not limited to equipment costs, engineering and consulting expenses, and finance charges. Expenses incurred in connection with new construction or expansion of existing facilities are Eligible Expenses only to the extent that additional expenses are incurred to achieve energy efficiency levels that exceed standard industry practices for new construction or expansion as determined by the Self-Direction Administrator based on practices generally utilized by energy engineering professionals and/or reference to publicly available resources for energy engineering.

Eligible Project: A DSM Project of an Eligible Customer that satisfies the Efficiency Criterion, is determined by the Self-Direction Administrator to be a project for which Self-Direction Credits will be available, and that was not provided an incentive through another Commission-approved program. To the extent the Company provided engineering services for an Eligible Project, an Eligible Customer may receive Self-Direction Credits only if they first repay direct costs incurred by the Company in connection with such engineering services. Company funded engineering costs will be waived for services completed more than three years from the date of receipt of all of the Required Information for a Pre-Qualification of a Proposed Project or Qualification of a Completed Project submittal.

Payback Period: The projected period for an Eligible Customer to recover all expenses actually incurred in connection with a DSM Project from electric energy and demand cost savings on a simple payback basis.

Required Information: Plans, drawings, energy and demand savings calculations, pay-back calculations, usage information, as-built information, receipts, expense itemizations, information regarding Company funding, financing arrangements and/or other data and information needed for determinations of an Eligible Customer, an Eligible Project, Eligible Expenses, or other matters required to be determined by the Self-Direction Administrator hereunder. Required Information shall include any information reasonably requested by the Self-Direction Administrator.

Transition Project: A DSM Project completed prior to September 23, 2003 that receives qualification as a Completed Project in accordance with Section 2 of the Provisions of Service and for which an Application for qualification is filed within six months of the Commission Approval Date of this Schedule 192. The customer bears the burden of documenting to the satisfaction of the Self-Direction Administrator the existence and the amount of all claimed expenditures.

AVAILABILITY OF SELF-DIRECTION CREDIT: An Eligible Customer that completes an Eligible Project on or after the Commission Approval Date of this Schedule 192 shall receive a Self-Direction Credit in the amount of eighty percent (80%) of Eligible Expenses, as determined in accordance with the Provisions of Service. ~~Total Self-Direction Credits available under this Section shall not exceed \$1,500,000 in any year. To the extent the Self-Direction Administrator determines at the time an Eligible Customer seeks pre-qualification or qualification of an Eligible Project under Sections 1 or 2 of the Provisions of Service that providing the credit would result in total credits under this Section that are projected to exceed \$1,500,000 in any year, such Eligible Customer will not be pre-qualified or qualified for Self-Direction Credits for that year in excess of such maximum value, and the Self-Direction Administrator shall provide written notice of such determination to the Eligible Customer, the Commission, the Division and the Committee.~~

DSM Cost Adjustment charges for 24 consecutive monthly billings if the Eligible Customer demonstrates to the satisfaction of the Self-Direction Administrator through an energy audit performed at the expense of the Eligible Customer by an auditor retained by the Self-Direction Administrator that there are no remaining Eligible Projects or other DSM Projects with a Payback Period of eight (8) years or less available at all of the Eligible Customer's facilities served through a meter or aggregated meters used as the basis for determining Eligible Customer status. This Fifty Percent Self-Direction Credit will not be available to an Eligible Customer during any time the Eligible Customer is receiving a Self-Direction Credit. ~~Total Self-Direction Credits available under this Section shall not exceed \$100,000 in any year. To the extent the Self-Direction Administrator determines at the time an Eligible Customer seeks a credit under this Section that providing the credit would result in total credits under this Section that are projected to exceed \$100,000 in any year, such Eligible Customer will not be entitled to Fifty Percent Self-Direction Credits for that year in excess of such maximum value, and the Self-Direction Administrator shall provide written notice of such determination to the Eligible Customer, the Commission, the Division and the Committee.~~
