Subject: Rocky Mountain Power

Docket No. 10-035-124

It was just made known that Rocky Mountain Power is again requesting a rate increase. We are asking you to deny this ridiculous increase.

With the state of the economy all business and citizens are in need of cutting back. This includes RMP.

In the past year we have already had rate increase $2.2\% + 13.7\% = 15.9\%$ in less than 12 months.

That's is enough. They can start by cutting costs. Their employees are getting paid WAY too much. Time to make cut backs like everyone else.

We don't have any other choice for power so they run a monopoly. It is up to you to keep them in check.

Please deny them this increase. People are finally starting to get back on their feet. This will hinder that progress and hinder the economic growth of the state.

DENY THE INCREASE FOR ONCE!

Taylor Waldron
