

Dear Public Service Commission,

1-28-11

To Whom It May Concern,
UTAH PUBLIC SERVICE COMMISSION

I have heard that Rocky Mountain Power is asking for another rate increase. This one is a more than a significant increase. PLEASE Do NOT approve it!

I am an Senior Citizen on a very meager budget. This is a time of an economic disaster.

The price charged by the power company is already over the top. The sneaky way they charge more during what they call peak times is already ridiculous. Even having a bare minimum charge is so out of line with this country. I happen to know that they waste so-o-o much money in their operation, that they need to be made to watch their spending as most if not all us rate payers have to do.

By raising it will not only cause many more hardships on the people, both middle class and the poor, that it is not necessary to do this.

This increase will make small business owners either cut back or go out of business, or lay off employees, and definitely raise their price to an all ready over burdened public.

I also know that Rocky Mountain Power as other big companies give large bonuses to their upper management.

Please make them sacrifice as We Poor, Middle Class public and small business have to do, especially during these bad economic times.

In all do respect, these Big Fat Cats can sacrifice TOO.

I am aware that probably most of the service commission have stock in Rocky Mt. Power. Please be honest with the public and give us the chance to live too.

Sincerely and pleadingly, a tax paying Senior Citizen needing your help.

John W. Park

P. S. The upper management already make too large of salaries, especially for what little they do!!!
