

Dear Public Service Commission,
To Whom It May Concern,

3-9-11

Docket No. 10-035-124

I see that Rocky Mountain Power is asking for another, unnecessary rate increase. You need to deny these rate increases until Rocky Mt. Power can prove that they are cutting costs, including Bonuses, ridiculously high Salaries, especially in the Management areas, and many other unnecessary costs.

I know that many of the Public Service Commissioners have stock in Rocky Mt. Power, so it definitely is in their best interests to vote for the increase. Please remember what it is doing to so-o many people that are hurting badly with their finances at this time. Also, all the Retirees, and those that are on fixed incomes and all those that are have low incomes.

I want all of the Commission to think what this greedy utility is doing to all of your and our children and grandchildren too.

We the people, as well as small business are having such a hard time scraping by trying to pay are bills and eat, just to barely scrape by an existence. We all need your help.

I am aware that most of you fat cats have large salaries and are financially well enough off that the increases don't bother you. This however is not real life for most of Rocky Mt. Powers customers. Where are the increases going to stop?

If you are going continue to allow these unnecessary increases, then let us have competition for the Utility so that they cannot just charge whatever they want because we as customers have NO other choice of service to go too.

Some day when all of have to meet our maker (The Lord) I hope that all us poor mistreated customers that you are allowing to be taken by the Utilities, get to watch you burn for your dishonest votes. This is as dishonest as if you robbed our homes.

Sincerely,

A VERY Concerned, Upset, Customer that has no recourse other than plead to you for us poor, for you to be Honest and Reasonable, and DENY the increases.

John W. Park
