UTAH PUBLIC  
SERVICE COMMISSION

2010 MAY -3 A 8:16

275045

To Whom It May Concern:

RECEIVED

I have been to the meetings and heard both sides of this issue. I'd like to make the following points:

#1 - While there is a need for these power lines in the geographic area, these lines are not specifically for Tooele County.

#2 - Tooele County residents really have no objection to the lines, just the placement of them.

#3 - The EIS is so outdated that RMP is asking the government entities to make a decision based on extremely outdated and incorrect information, i.e., where the EIS shows less than 15 homes, there are now over 300.

#4 - There is excessive land available to put these lines on in Tooele County that would not impact the citizenry, their health, welfare or livelihood.

#5 - The route that RMP wants to put these lines on goes directly over the Settlement Canyon Dam, where you will find people fishing almost all year long. It goes directly over Settlement Canyon itself, where there are cattle, campers, hikers, etc. It goes directly over the Tooele City water shed, endangering our culinary water, the Tooele High School "T". If these lines go in this area they will put at hazard anyone wanting to use any of these facilities.

#6 - The reason RMP wants this route is because it's cheaper for them. It doesn't seem to matter to them that they not only will be impeding the lifestyle of the citizens of Tooele County, but also the health and well being of those same citizens, customers of theirs even.

We are not asking that the line be done away with, just that it be put in an area that it won't create a hazard for our citizens and impede those things that we enjoy by living here. There have been other routes proposed to RMP that would still accomplish their goal, however, they are more concerned with their share holders than the citizens of Tooele County.
