Existing Condition – Viewing east, southeast towards Middle Canyon and the Oquirrh Mountains.

Simulated Condition – Proposed 345kV transmission line.

View Location: Middle Canyon Road at Oquirrh Hills Golf Course.

Structure models that were used in the simulations were created using diagrams provided by Rocky Mountain Power. This simulation represents a schematic concept design that will be refined and finalized. Actual final structure sizes, heights, materials, and conductor sag will vary on a case-by-case basis.
