

Re-vegetation

What are our intentions for re-vegetation

The BLM requires that Rocky Mountain Power employ a number of measures to minimize the impacts to vegetation from construction activities. To address this issue, a draft Reclamation, Revegetation, and Weed Management Plan (Plan) is currently under refinement and is anticipated to be incorporated into the Plan of Development (POD) prior to issuance of a BLM right-of-way grant. Rocky Mountain Power would agree to adhere to a condition of the Conditional Use Permit (CUP) to collaborate with the appropriate Tooele County officials to develop an appendix to the Plan that addresses any Tooele County statutory requirements not specifically addressed in the Plan, if any.
