

To whom it may concern:

May 10, 2010

On behalf of the Tooele community and our family, we have concerns about the proposal to install a power line on the east bench of Tooele. Although we understand the power lines are necessary, we feel that the alternative solution to place the lines on the Westside in the desert would serve the purpose and not affect the residents in Tooele. The following list, are concerns that all of Tooele residents are upset about. Please reconsider the decision. We would sincerely appreciate your cooperation in this matter.

Defacing the untouched forestry

High fire potential

Effects on wildlife including wild turkeys, elk and deer

Devalue property

Health hazards stemming from power in poles

Damage caused by maintenance

High traffic

Unattractive poles for the community to view each and every day.

This project does not benefit Tooele. Place the project where it will benefit those that will use it.

Government officials did not notify residents of this project. This is totally unacceptable.

Distraction from the Letter T standing for Tooele on the mountainside. This affects children and adults throughout the community. Especially those that have lived here most of their lives. The T has memories and sentimental value. This should not be taken away from us.

Reconsider this decision so that we may keep the neighbors we have come to love.

Threats are being made that neighbors will move before living with power poles in the community or in back yards. Tooele has been a city we are proud of. Please don't ruin it for many of us.

We are prepared to take legal action if necessary..

Thanks for your time.

Sincerely,

Ron and Janet Vincent
