Even though we do not oppose the construction of power lines in Tooele, we vehemently oppose the current route. It is foolish to take the most scenic section of the valley and build these large and unsightly lines with wanton disregard for their negative effect on the community. I would support an alternate route perhaps through the middle of the valley near Tooele's industrial area. **Do not build these lines as they are currently proposed.** The damage to our community would be irreparable as would Rocky Mountain Power's reputation.

Sincerely,

The Lymans
