- The date of the building permit application shall establish the applicable version of the Utah energy code.
- The total connected interior lighting power for New Construction/Major Renovation projects required to comply with the energy code must be 10 percent lower than the interior lighting power allowance calculated under the applicable version of the Utah energy code. The date of the building permit application shall establish the current version of the Code. For New Construction/Major Renovation projects not required to comply with the energy code, the total connected lighting power must be 10% lower than common practice as determined by the Company.
- Incentives are not available for lighting controls required under the applicable version of the Utah energy code.
- 2' U-tube lamps may be substituted for 4' linear fluorescent lamps in the above table.
- Electronic ballasts for High Bay fixtures are required to have a ballast factor \leq 1.2 to be eligible for incentives.
- To determine the length of LED channel letter signs, measure the length of individual letter at the centerline and add the individual values; do not measure the distance between letters.
