

**ELECTRIC SERVICE SCHEDULE NO. 107 - Continued**

(N),(D)

**PURPOSE:** Service under this schedule is intended to promote the installation of solar photovoltaic (PV) electric generation equipment by customers designed to offset electricity usage on the System site. A System designed for the sale of power is not eligible for participation in this Schedule. The Program will pay customers a rebate incentive upon completion, inspection and interconnection of approved projects.

**CUSTOMER PARTICIPATION:** Customer participation is voluntary and initiated by following participation procedures listed on the Program web site, [www.rockymountainpower.net/env/nmcg/usip.html](http://www.rockymountainpower.net/env/nmcg/usip.html).

**PROGRAM PROCESS:**

1. **Application:** In order to be eligible for an incentive, Customer must submit an application and receive confirmation of acceptance from the Program Administrator prior to purchasing equipment.
2. **Enrollment Process:** A lottery process will be used to accept applications across all Program Sectors, as outlined below:
  - a. During the first two weeks of each Program Year, the Company will receive applications from Customers. After the end of the two-week period, the Company will use a randomization method to assign a queue position to all applicants (lottery process).
  - b. If the available capacity for the Program Year, as shown on Table 2 of this tariff, is over-subscribed within the two-week period, additional applicants will be placed on a waiting list in the order selected by the lottery process.
  - c. The waiting list will not carry over to subsequent Program Years.
  - d. If available capacity for the Program Year is not fully subscribed after the lottery process, additional applications will be accepted on a first-come, first-served basis.
  - e. Within each Program Year, the Company will continue to accept applications to replace forfeited applications until incentives are awarded for all available capacity within each Program Sector.
  - f. A Customer is not prohibited from submitting an application requesting additional incentives in subsequent Program Years. However, first priority will be given to first-time incentive applicants. Subsequent applications from Program participants will only be considered if the applicable Program Sector has not been fully subscribed for that same Program Year by first-time applicants. All subsequent applications will be considered and, if appropriate, accepted on a first-come, first-served basis.
