**Subject:** power increases

*Docket No. 11-035-200*

---

I was just writing to ask that you do not allow the power company to raise prices of electricity. I have not received a raise in income in our household for five years. I am sick and tired of the power company always raising rates. I think it's ridiculous. It is really frustrating. I believe that most Utah families are already struggling and this would be a very difficult price increase. My home is 100 percent electric. My heaters work on electricity. There are great things about that, I don't have to worry about Carbon Monoxide, etc. Some negatives to that are that the power bill never decreases! All of my family and friends saw a decrease in their bill when natural gas prices went down, not me, mine has been steadily increasing since I purchased my home.

Please ask Rocky Mountain Power to find another way to get more income. My family and others cannot afford to have our priced increased again.

Thank you,  
Sarah Lockhart
