OCS Data Request 2.91

**OCS Data Request 2.91**

Identify any transactions included in the test year which require use of the Centralia Point to Point contract.

**Response to OCS Data Request 2.91**

No transactions currently included in the Company's filing require the use of the Centralia PTP transmission; however, the Company uses this contract by redirecting portions of its capacity to different paths on a short term basis, thereby avoiding purchasing additional wheeling from BPA. In addition, the Company has recently resold a portion of its Centralia PTP transmission rights and will be including this revenue for the first month of the test period in the Utah Rebuttal NPC update. The total revenue amount is \$217,080. Please refer to Confidential Attachment 2.91 for a copy of the contracts.

Confidential information is provided subject to Rule 746-100-16 of the Commission Rules.
