Resource Plan )  
) AMENDED NOTICE OF TECHNICAL  
) CONFERENCE  
)  
-----

ISSUED: November 15, 2012

By The Commission:

Pursuant to the discussion and agreements reached at the scheduling conference held November 8, 2012, in the matters above, and in preparation for the forthcoming November 28, 2012, technical conference previously noticed in the matters above on November 9, 2012, the Commission provides this follow-up inquiry regarding the Company's November 6, 2012, response to UPSC Data Request 1:

1. In the "Residuals" tab of the Excel spreadsheets labeled "Attach UPCS 1-1" and "Attach UPSC 1-2", it is not clear what the "actual" data represents, particularly as it relates to Utah's or Wyoming's large industrial loads. Please describe this data, provide the source of the data, label the units of measurement, and explain how it is related to industrial load in Utah and Wyoming. Also, please explain how this data relates to the predictive model referenced in the Company's response.
2. Regarding the "Model Statistics" tab in the Excel spreadsheets labeled "Attach UPCS 1-1" and "Attach UPSC 1-2", please briefly describe the type of statistical model (i.e., regression, simultaneous equation, iterative bootstrapping, etc.) used to estimate the predicted values included in the spreadsheets. Please describe each variable specified within the model along with the Company's rationale for selecting each variable. Please provide the estimated model coefficients along with their associated standard errors, t-statistics, p-values (or the appropriate measures of each inferential parameter's statistical significance).

DOCKET NOS. 11-035-73 AND 11-2035-01

- 2 -

DATED at Salt Lake City, Utah this 15<sup>th</sup> day of November, 2012.

/s/ Gary L. Widerburg  
Commission Secretary  
D#238534
