UIEC Data Request 1.12

**UIEC Data Request 1.12**

Please provide the value of the total number of kilowatt-hours PacifiCorp expects to carry forward as excess kilowatt-hours in RECs over what it intends to use for compliance or sell in 2012, indicating the value for each separate month and explain what valuation methodology PacifiCorp used and why.

**Response to UIEC Data Request 1.12**

PacifiCorp has not assessed any value to the total number of kilowatt-hours carried forward, as there is no liquid market or forward price curve value for renewable energy credits (RECs).

UIEC Data Request 1.14

**UIEC Data Request 1.14**

Please provide by month for each month for January 2008 through December 2011, the revenue PacifiCorp received for the sales that are the subject of the previous request.

**Response to UIEC Data Request 1.14**

The Company objects to providing the requested data for years 2008-2010 on the grounds that the data is not relevant to the REC Deferral Period in this case. For 2011 data, please refer to Attachment UIEC 1.14 for the revenue received, for calendar year 2011, for the REC sales shown in the Company's response to UIEC Data Request 1.13.

UIEC Data Request 1.15

**UIEC Data Request 1.15**

Of the RECs owned or acquired by PacifiCorp, please state for each month for January 2008 through December 2011, the quantity in kilowatt-hours used for compliance by PacifiCorp.

**Response to UIEC Data Request 1.15**

The Company objects to providing the requested data for years 2008-2010 on the grounds that the data is not relevant to the REC Deferral Period in this case. For 2011 data, please refer to the Company's response to UIEC Data Request 1.7, specifically Confidential Attachment UIEC 1.7. Some of the renewable energy credits (RECs) held for compliance may not yet be retired and may be used in a future compliance year.

May 3, 2012  
UIEC Data Request 1.16

**UIEC Data Request 1.16**

Please provide by month for each month for January 2008 through December 2011, the (a) average compliance market price for RECs, and (b) average voluntary market price for RECs.

**Response to UIEC Data Request 1.16**

The Company does not have: (a) an average compliance market price for renewable energy credits (RECs); nor (b) an average voluntary market price for RECs. The Company is required to ensure that it meets the compliance requirements in each state; the Company does not ascribe a value to RECs retained for compliance. Furthermore, the Company does not sell RECs into a specific, organized voluntary REC market where market prices can be readily reviewed and tracked on a historical or forward basis.

May 3, 2012  
UIEC Data Request 1.17

**UIEC Data Request 1.17**

Please provide the value of the total number of kilowatt-hours PacifiCorp expects to carry forward as excess kilowatt-hours in RECs over what it intends to use for compliance or sell in 2012, indicating the value for each separate month and explain what valuation methodology PacifiCorp used and why.

**Response to UIEC Data Request 1.17**

There is no specific attributed value for a renewable energy credit (REC) that is held and not sold or used for compliance. The value of a REC is not transparent and not liquid and the value is not known until you find a viable buyer and until then it is highly speculative
