ISSUED: October 29, 2013

By The Commission:

On May 10, 2013, the Commission issued its order (“May 10 Order”) in this docket approving the projected costs of the resource decision of Rocky Mountain Power, a division of PacifiCorp (“RMP” or “Company”), to construct selective catalytic reduction (“SCR”) systems on Units 3 and 4 of the Jim Bridger coal-fired steam electric plant (“Project”). On May 30, 2013, the Commission issued an order of clarification adjusting RMP’s approved projected costs included in the May 10 Order, among other things (“May 30 Order”). The May 30 Order also clarified that RMP’s approved projected costs are comprised of Engineering, Procurement and Construction (“EPC”) costs and non-EPC costs.

As noted in the May 10 Order and May 30 Order, the Commission’s approval of the Company’s projected costs is conditioned on our review of the final executed EPC for the Project (“Final EPC”). Specifically, if RMP’s relevant costs included in the Final EPC are less than RMP’s relevant projected EPC costs included in the May 30 Order, RMP’s approved projected costs shall be reduced accordingly. Pursuant to UCA § 54-17-403, any increase from this projected cost is subject to Commission review as part of a rate hearing under UCA § 54-7-12, except to the extent the Commission issues an order under UCA § 54-17-404.
