Commission Secretary

Re: Advice No. 12-10  
Schedule 135, Net Metering Service

In its February 12, 2009 order in Docket 08-035-78, the Commission directed Rocky Mountain Power to update annually the valuation of net excess generation credits for large non-residential customers in Schedule 135, Net Metering Service, to reflect the average retail rates for the previous year's Federal Energy Regulation Commission Form No. 1.

Enclosed for filing are an original and two copies of proposed tariff page associated with Tariff P.S.C.U. No. 48 of Rocky Mountain Power applicable to electric service in the State of Utah. Also provided with this filing is Exhibit 1, which shows the calculation of the average retail rate credit prices for large non-residential customers. The Company will also provide an electronic version of this filing to [psc@utah.gov](mailto:psc@utah.gov). The Company respectfully requests an effective date of July 1, 2012.

First Revision of Sheet No. 135-4                      Schedule 135                      Net Metering Service

Also, as directed by the Commission in Docket 08-035-78, Rocky Mountain will file by the end of June, under a separate advice letter, updated Schedule No. 37 avoided cost.

It is respectfully requested that all formal correspondence and staff requests regarding this matter be addressed to:
