- Homes must include air conditioning or evaporative cooling, excepting homes located in climate zone 6, or above 6000 feet elevation.
- Packaged Terminal Air Conditioning (PTAC) units which exceed federal minimum standards of 10.0 EER may be substituted for SEER 13 AC units.
- Packaged Terminal Air Conditioning (PTAC) units which exceed 14.3 EER may be substituted for SEER 15 A/C units.

**COOPERATIVE MARKETING:** In addition to builder incentives listed in Tables 1, 2, 3 and 4, participating builders may be offered the opportunity to participate in a cooperative marketing fund administered by the New Homes Program for homes certified ENERGY STAR. Participating builders will be expected to pay for a percentage of qualifying Rocky Mountain Power New Homes program advertisements and/or promotions with the balance and the Program will provide the remainder of the funds. The formula for the builder contributions will be contained in the Cooperative Marketing Agreement. There is a limited amount of funds and they will be distributed on a first come-first served basis.
