

ELECTRIC SERVICE REGULATION - Continued

3. REFUSAL OF SERVICE

The Company shall have the right, but does not assume the duty to inspect the Customer's installation at any reasonable time. The Company reserves the right to disconnect service or to refuse to connect or supply service:

- (a) when the Customer's wiring or facilities are in the Company's judgment unsafe or hazardous to the Customer or others or found to be in violation of applicable laws, ordinances, rules or regulations.
- (b) where such connection or service will adversely affect or impair the service to its other Customers.
- (c) where the applicant or Customer has not complied with state, municipal or Company regulations.
- (d) until the Customer is advised by proper authority that the wiring and utilization equipment to be served have been inspected and passed by the controlling public inspection authority, where inspection is required by local ordinance or other authorized procedures. Any affidavits or certificates of inspection required by law must be furnished before service is connected.

4. COMPANY LIABILITY

Nothing in these Electric Service Regulations shall be construed as placing upon the Company any responsibility for the condition or maintenance of the Customer's wiring, current consuming devices or other equipment, and the Company shall not be held liable for any loss or damage resulting from defects in the Customer's installation and shall not be held liable for damage to persons or property arising from the use of the service on the premises of the Customer.
