

ELECTRIC SERVICE SCHEDULE NO. 107 - Continued

PURPOSE: Service under this schedule is intended to promote the installation of solar photovoltaic (PV) electric generation equipment by customers designed to offset electricity usage on the System site. A System designed for the sale of power is not eligible for participation in this Schedule, except to the extent that the system is compliant with Section 54-2-1(16)(d) of the Utah Code. The Program will pay customers a rebate incentive upon completion, inspection and interconnection of approved projects. (N)

CUSTOMER PARTICIPATION: Customer participation is voluntary and initiated by following participation procedures listed on the Program web site, www.rockymountainpower.net/env/nmcg/usip.html.

PROGRAM PROCESS:

- 1. Application:** In order to be eligible for an incentive, Customer must submit an application and receive confirmation of acceptance from the Program Administrator prior to purchasing equipment.
- 2. Enrollment Process:** A lottery process will be used to accept applications across all Program Sectors, as outlined below:
 - a. The Company will begin to accept applications on January 15, or the next business day if January 15 falls on a weekend, of each Program Year. After a two-week period, the Company will use a randomization method to assign a queue position to all applicants (lottery process). (C)
 - b. If the available capacity for the Program Year, as shown on Table 2 of this tariff, is over-subscribed within the two-week period, additional applicants will be placed on a waiting list in the order selected by the lottery process. (C)
 - c. The waiting list will not carry over to subsequent Program Years.
 - d. If available capacity for the Program Year is not fully subscribed after the lottery process, additional applications will be accepted on a first-come, first-served basis.
 - e. Within each Program Year, the Company will continue to accept applications to replace forfeited applications until incentives are awarded for all available capacity within each Program Sector.
 - f. A Customer is not prohibited from submitting an application requesting additional incentives in subsequent Program Years. However, first priority will be given to first-time incentive applicants. Subsequent applications from Program participants will only be considered if the applicable Program Sector has not been fully subscribed for that same Program Year by first-time applicants. All subsequent applications will be considered and, if appropriate, accepted on a first-come, first-served basis.
