RE: Blue Mountain Power Partners, LLC - Blue Mountain II / LGIQ0426 - Complete Application Acknowledgement

Dear Mr. Karl:

PacifiCorp acknowledges receipt July 2, 2012, of Blue Mountain Power Partners, LLC ("Interconnection Customer") completed technical data and site control submission, which completes its original request application, submitted June 29, 2012, for the proposed interconnection of Interconnection Customer's 80 MW Large Generating Facility to be interconnected approximately 10 miles north of the Pinto substation along the existing 138 kV transmission line pursuant to PacifiCorp's Standard Large Generator Interconnection Procedures, Part 4 of PacifiCorp's Open Access Transmission Tariff, Federal Energy Regulatory Commission Electric Tariff, Volume No. 11 ("Interconnection Procedures").

Interconnection Customer's application for interconnection is hereby **deemed complete**. Pursuant to Section 38.3.2 and 38.3.3 of the Interconnection Procedures, enclosed is a copy of your application and an example of PacifiCorp's standard form Interconnection Feasibility Study Agreement. PacifiCorp will be contacting Interconnection Customer to make arrangements for a Scoping Meeting pursuant to Section 38.3.4 of the Interconnection Procedures.

Please be aware that based on our experience with actual interconnection projects, it may be unlikely that your project will be able to meet your requested In-Service Date of August 31, 2014. Based upon historical averages, the study process that PacifiCorp undertakes to evaluate the possible impacts of interconnecting your proposed generation facility takes approximately 12 months. Construction, if required, may take an additional 18 months or more depending upon the specific requirements associated with your project.

Each project is unique, and the individual requirements associated with your project may require more or less time to interconnect your proposed generation facility and as stated, the proposed August 2014 date is not compatible with these averages. Please submit a revised In-Service date that is consistent with these averages or contact your account manager, Tom Fishback, at 503-813-6102.

If you have any questions, please contact me at (503) 813-6102.

Sincerely,

Tom Fishback  
PacifiCorp  
Account Manager
