Date: March 27, 2013

Re: 13-035-01 (11-999-05) Rocky Mountain Power's Proposed Utah Service Reliability Performance Baseline

Pursuant to Rule R746-313(2) and R746-313(3), the Company filed its Utah Service reliability Performance Baselines and the other requirements of the Rules with the Commission on January 7, 2013. On the same date, the Commission issued an Action Request asking the Division to review the Company's filing and make recommendations. The Commission also asked the Division to report back by February 6, 2013. The Division reviewed the Company's filing and expressed some concern in relation to the methods used to determine the baselines and notification limits for SAIDI and SAIFI. The Division relayed its concerns to the Company which decided to file with the Commission a revised version of the original filing, which considers the Division's concerns. Consequently, on February 6, 2012, the Division requested that the Commission extend the reporting due date to March 6, 2013. In its Order on this Docket dated February 11, 2013, the Commission granted the extension.

On March 5, 2013, the Company filed with the Commission its revised filing. The Division reviewed the revised filing in light of Rules R746-313-4 (2) and R746-313-4 (3)

and the reasonableness of the methods used to determine the baselines and the notification limits for SAIDI and SAIFI. Based on its review, the Division concluded that Company is in compliance with the Commission Rules R746-313-4 (2) and R746-313-4 (3) and that the methods used to determine the baselines and notification limits for the SAIDI and SAIFI are reasonable. On March 7, 2013, the Division filed its memorandum responding to the Commission's Action Request dated January 7, 2013 recommending approval of the Company's revised filing.

However, On March 8, 2013, the Commission Issued an Action Request requesting the Division to review the Company's revised application and make recommendations and report back to the Commission by April 5, 2013. In response to this Action Request, the Division would like to indicate that the Division's memorandum dated March 6, 2013 that was filed with the Commission on March 7, 2013 contains the Division's findings of its review and recommendations of the Company's revised filing. Therefore, the Division would propose that the Commission consider this memorandum as responding to this Action Request and close the Action Request.
