Re: Docket No. 13-035-02
In the Matter of the Application of Rocky Mountain Power for Authority to
Change its Depreciation Rates Effective January 1, 2014

On November 7, 2013, the Public Service Commission of Utah approved an all-party stipulation in Docket No. 13-035-02. Paragraph 30 of the Settlement Stipulation states:

The Stipulating Parties agree the Company will implement a reporting system to keep the Stipulating Parties and the Utah, Idaho and Wyoming Commissions informed regarding any matters likely to have implications regarding potential stranded costs of generating assets. The Company will propose a reporting method by no later than December 31, 2013.

Per this commitment, Rocky Mountain Power proposes to implement a reporting system that provides information regarding three scenarios which the Company has identified as having significant implications on the Company's depreciation expense. On or before March 1 of every year, the Company will file a letter containing the following information, if applicable.

- 1) Any proposed early steam generation unit retirement
 - a. Plant name
 - b. Date placed in service
 - c. Current net book value
 - d. Original retirement date
 - e. Proposed early shutdown date
 - f. Reason for early shutdown

- 2) Major steam plant capital additions over \$100m that impact the depreciation of the unit
 - a. Project name
 - b. Planned in-service date
 - c. Planned retirement date
 - d. Planned addition amount to plant in service

- 3) Any completed external studies regarding plant decommissioning which result in significant changes (a change of over 25 percent) to the amount previously projected in the last approved depreciation rates.
 - a. Plant site
 - b. Estimated costs

Questions regarding this proposal may be directed to Dave Taylor at (801) 220-2923.

Very truly yours,

Jeffrey K. Larsen
Vice President, Regulation and Government Affairs
