Ed,

Attached is another turn of the PPA. I have made a few minor edits upon my final review. Nothing substantive, but just some clean up items to better address what occurs when/if you change turbine types. The edits are showing as redline changes – you should be able to accept all and have a clean version.

Please review and let me know if you are ok with this version. Also, it appears some of the footers/page numbers are off in the Exhibits. If you could review those and the table of contents and clean those up, I believe this would be the executable version pending final management and legal approval on our end.

Thanks,

Paul
