**Subject:** Q426: Blue Mtn Interconnect

Hi Tom:

As a follow-up to our call, I wanted to confirm that PacifiCorp has signed a QF PPA with Blue Mtn Power Partners and they advised it will be filed with the PSC next week. At this point we need to resolve the point of interconnect issue. We applied to interconnect at Pole 365 and need the right to connect to PacifiCorp's transmission line on property we have control of and rights to. We do not have the land right to connect to pole 390 nor do we believe a substation will ever be built for that proposed project.

Just so the situation is clear, we made a proposal to Q420 to build just one substation that both projects could connect to and the parties would cooperate to provide reciprocal land rights and share costs such that each project would receive the benefit of a substantial cost savings over two separate substations. That proposal was rejected by Q420. Please review and advise at your earliest. Thank you and best regards.
