**Re: Facility Study LGIQ0426
Blue Mountain Wind Project
San Juan County, UT**

0098 5 - 000

Gentlemen:

Thank you for your e-mail dated July 22, 2013 confirming that Pacificorp will allow us to interconnect at the Point of Interconnect ("POI) which we originally requested and applied for, specifically near pole 365. We appreciate your assistance in resolving this matter and understand that you will revise and update the System Impact Study dated January 11, 2013, including the scope of work, to reflect this agreement and POI. Also, please note that our Scheduled COD date in the PPA is November 30, 2015 and please take this new date into account in the revised study.

Enclosed is the signed Facility Study agreement for the above referenced project along with our check number 1073 in the amount of \$100,000 as the required deposit. We would ask that you complete the Facility Study as soon as possible. We are sending this check with the understanding that our POI will be near Pole 365 and your deposit of the enclosed check shall be deemed an acknowledgement of this agreement.

Additionally, it looks like we are going to use the Vestas V110 WTG in lieu of the GE 1.7 WTG originally studied. We would request that Pacificorp revise the studies for the Vestas V110 WTG.

In the event you would like to discuss any of these matters or the project further, please give me a call. I can be reached at (805) 568-0300. Thank you and best regards.

Very truly yours,

BLUE MOUNTAIN POWER PARTNERS, LLC
