

RMP 2014 GRC Filing Requirements

R746-700-22.B.6

Models: Workable versions of Models utilized in determining or projecting rate case values, with formulae intact and source data included, along with available instructions and write-ups regarding use of the Model and written descriptions of the Model and its inputs.

Response to R746-700-22.B.6

(a) The net power cost model, the web-based Generation and Regulation Initiative Decision Tool (GRID) model – access to the GRID model and GRID project relevant to this general rate case (GRC) proceeding has been enabled for the following individuals:

- Jamie Dalton, Public Service Commission of Utah Staff
- John Harvey, Public Service Commission of Utah Staff
- Charles Peterson, Utah Division of Public Utilities
- Phil Hayet, Consultant for Utah Office of Consumer Services
- Leah Justin, Consultant for Utah Office of Consumer Services

Access to the GRID model and GRID project for other individuals will be provided upon request to the Company by individuals who have signed the protective agreement in this GRC.

Please refer to the Company's response to Filing Requirement R746-700-23.C.6, which provides the latest documentation for GRID.

(b) Revenue Requirement – 'UT GRC JAM – June 2015 Test Period'.

(c) Class Cost of Service – refer to the workpapers (Tabs 1, 4 and 5) and Exhibit RMP__(JRS-3), Tab 1.
