To: psc@utah.gov

Please do not allow Rocky Mountain Power to charge a fee for solar. We are trying to clean up this horrible air we've created. So charging a penalty for solar is like charging people to car pool in that it will not help with our air quality. A less central power grid is not as vulnerable to catastrophes. Do not ignore the value of solar on the rooftops thru out Utah. It means a huge reduction on the need to build new expensive power plants, no energy is lost in transmission, no transmission lines needed. Long term benefits that will help the utility hedge against price increases of fossil fuels in the future. Solar can only help the people and the environment in the long run.

Thank you
Galen Schuck
