To Whom It May Concern:

I was recently informed regarding Rocky Mountain Powers desire to increase fees for individuals with rooftop solar and would encourage you to reject any such proposal. Individuals with rooftop solar and using their own initiative and money to improve their own home and community by allowing for cleaner energy which will result in cleaner air and more energy independence. These individuals should not be punished with an increase in their monthly bills. Furthermore, Rocky Mountain Power is a state supported monopoly. Being a monopoly with the preferential treatment that essentially ensures its success and profit, they should be doing things to encourage improving the community, such as supporting solar power, rather than fighting against it. Please reject any such measure to increase rates for individuals with solar panels. Thank you.

Sincerely,  
Chad Farnes
