Commission Chairman Ron Allen
UT

Dear Commission Chairman Allen,

I am opposed to Rocky Mountain Power's proposed rooftop solar fee of \$4.25 per month. My wife and I are contemplating installing solar panels on our home this summer and an additional fee would raise long-term concerns about the financial stability of such an investment. With our air quality as poor as it is we need to minimize barriers to clean energy. The monthly fee, while modest, may discourage some Utahns from adopting solar energy. Please refrain from implementing an extra fee for solar energy users. Thank you for your consideration.

Sincerely,

Russell Benefield
