Subject: Keep solar fair in Utah
To: tleva@utah.gov

Dear Commissioner LeVar,

Competition and consumer choice is important to true free market economics. If solar is taxed not only will it threaten jobs, it will also prevent the expansion of our competitive edge within the tech sector that so much has been done to encourage. We are on the cusp of becoming the Silicon Mountains. Clean energy is important to court the companies and talent Utah needs for years to come.

Please keep us on the cutting edge.

Sincerely,

Christopher Polk
