Reed Warnick, Interim Director
Committee of Consumer Services

Dear Committee of Consumer Services,

We are very upset that Rocky Mt. Power is asking to charge us \$5 a month for using solar power when we have gone to the expense of adding solar units and equipment so we can use less coal power from Rocky Mt.

We already pay for Blue Sky energy. In addition we generate more power than we use many months of the year and this excess is fed back into the grid.

If you do increase our rate we will have no choice but to drop the Blue Sky units that we are currently paying for. We cannot see that we are being treated fairly for trying to do our part using clean energy.

Sincerely yours,

Mary and Mike Suarez
