I do not think rocky mountain power should raise the utility fees on customers who have solar power. We have solar because it will save us money in the long run. It will also keep our air cleaner. Isn't that what we all should be doing? Rocky Mountain Power does not have any competition. They don't try to run their company more efficient. It just as easy to keep asking for millions of dollars and they get it. They need employees to think outside the lines and make their company more profitable. Maybe they should think about solar for their company.
