Re: Rocky Mountain Power Rate Application
Docket 13-035-184

Dear Commissioners:

On November 14, 2014, on behalf of property owners that were victims of the Wood Hollow fire, I filed a comment in the pending rate proceeding initiated by Rocky Mountain Power. Although the portion of the rate application related to the Wood Hollow fire was approved by the Public Service Commission on August 29, 2014, without notice to us or our clients, the amount authorized to be "passed through" to the rate payers under this specific rate application appears to be limited in scope. We do not believe that it is appropriate to have any of the fees, costs or expenses related to the Wood Hollow fire passed through to rate payers until Rocky Mountain Power's culpability for the fire is resolved. Please consider the comments made in connection with the rate application, to the extent pertinent, to help foster transparency in the rate making process. In addition, we would like to be included in any further discussion, or application submitted by Rocky Mountain Power to the Public Service Commission, which seeks to "pass through" costs to the rate payers associated with the Wood Hollow fire.

Respectfully submitted,
