

**ELECTRIC SERVICE SCHEDULE NO. 31 - Continued**

**DEFINITIONS:**

**BACKUP CONTRACT POWER:** The specified Power in kilowatts of Backup Power that the Customer contracts with the Company to supply and which the Company agrees to have available for delivery to the Customer in excess of which the Company is under no obligation to supply. The Backup Contract Power shall be established by agreement between the Customer and the Company. The level of Backup Contract Power shall not exceed the total output capacity of the Customer's generation facilities.

**BACKUP POWER – DAILY:** The kW of Backup Contract Power supplied by the Company to the Customer. Backup Power shall be determined for each day of the Billing Period. The kW of Backup Power each day shall be the kW for the fifteen (15) minute period of the Customer's greatest use of Backup Power that day, adjusted for power factor as specified, determined to the nearest kW. The Backup Power for the Billing Period shall be the sum of the Backup Power for each day of the Billing Period. For each fifteen minute period, Backup Power shall equal the Measured Power minus the Supplementary Contract Power but shall not be less than zero nor greater than the Backup Contract Power.

**BACKUP SERVICE:** Backup service is electric service used by the Customer to replace electric service ordinarily generated by the Customer's own generation equipment during forced or maintenance outages of the facility.

**BILLING PERIOD:** The period of approximately 30 days intervening between regular successive meter reading dates. There shall be 12 billing periods per year.

**POWER:** The rate in kilowatts at which electric energy is generated, transferred or used. Power measurements are calculated based on the average (integrated) usage over consecutive 15 minute periods of time. Power measurements may be based on any one such fifteen minute period in a Billing Period, on the period of greatest use during the Billing Period, or on the period of greatest use during each day, adjusted for power factor as specified, determined to the nearest kW.

**EXCESS POWER:** Excess Power is the power supplied by the Company to the Customer in excess of the Total Contract Power. The kW of Excess Power for the Billing Period shall be the kW for the 15 minute period of the Customer's greatest use of Excess Power during the Billing Period, adjusted for power factor as specified, determined to the nearest kW. For each 15 minute period, Excess Power shall equal the Measured Power minus the Total Contract Power but shall not be less than zero.

**EXCESS SERVICE:** Excess service is service used by the Customer over and above the contracted amount for both Supplementary Service and Backup Service or Maintenance Service.
