Subject: Docket No. 13-035-71, 2012 Demand-Side Management 2012
Annual Energy Efficiency and Peak Load Reduction Report

Rocky Mountain Power (Company) filed with the Public Service Commission of Utah (Commission) the 2012 Annual Energy Efficiency and Peak Load Reduction Report (Report) on May 1, 2013. On June 18 the Office of Consumer Services (Office) and the Division of Public Utilities (Division) each filed comments regarding the Report. The Office identified one error and noted instances where the Report did not comply with Commission ordered requirements. The Division recommended conditional acknowledgment and also noted that the Report does not comply with all Commission requirements from Dockets 09-035-27 and 11-035-74.

On June 24, 2013, the Office received an email from the Company stating:

“We are working on the corrections and necessary additions caught by your office and the Division. We hope to get an updated Annual Report submitted in the next couple of days.”

Although the Office has not yet received an updated Report we expect that it will be provided as soon as it is available.

At this time the Office has no recommendations beyond those in our initial comments filed on June 18, 2013.
