ACTION REQUEST RESPONSE

To: Public Service Commission of Utah

From: Division of Public Utilities
Chris Parker, Director
Energy Section
Artie Powell, Manager
David T. Thomson, Technical Consultant

Date: May 29, 2013

Re: Docket No. 13-035-72 PacifiCorp's Results of Operations Report for the Twelve Months Ended December 31, 2012. In the Matter of PacifiCorp's Results of Operations Report for the Utah Jurisdiction for the Twelve Months Ended December 31, 2012

On April 30, 2013, Rocky Mountain Power ("Company") filed with the Commission its December 2012 Results of Operations and a confidential Wind Resources Report for the twelve months ended December 31, 2012. The wind report was provided in compliance with the Commission's final order in Docket No. 07-035-93. On May 7, 2013, the Commission issued an Action Request to the Division requesting a review of the filing and to make recommendations. The Commission asked the Division to report back by June 14, 2013.

Upon initial review of the filing, the Division has determined that the review will require requests for information from the Company and the preparation of DPU in-house modeling of spreadsheets and review procedures. The Company has told the Division that its initial request for a reconciliation of the results to its FERC Form 1 and SEC 10 K filings for 2012 will take up to 4 to 6 weeks. Under the current process, data requests issued after receiving the reconciliation would require a 30 day turnaround. Additional

follow-up data requests to the Company would require an additional 30 Days. Therefore, the Division is hereby requesting that the Commission extend the due date of the Division's response to the Action Request to September 15, 2013. This will allow the Division adequate time to make the proper review and recommendations. The extension date could probably be shortened if the 30 day deadline for data requests were reduced to two or three weeks.
