UCE Data Request 4.13

UCE Data Request 4.13

Sensitivity analysis: Please run System Optimizer with the same assumptions as used in EG2-C07 with the following changes:

- Assume a base capital cost of \$2.14/W(DC) for the “PV Poly-Si Single Tracking” solar resources;
- Assume a base capital cost of \$1.80/W(DC) for the “PV Poly-Si Fixed Tilt” solar resources;
- Capacity values of 68% and 84% for fixed and tracking PV resources, respectively; and
- A 10% investment tax credit after 2016.

Response to UCE Data Request 4.13

The Company objects to the request on the grounds that it is calling for a study that is not in the Company’s custody, possession or control.
