This is not time to increase rates on people trying to do the right thing for fellow Utahans too, not just ourselves. Clean air should be the number one priority because of our valley here in Salt Lake. Rocky Mt Power should be doing everything they can to encourage more CLEAN energy and should be investing in alternative energy sources instead of being such a supporter of dirty energy. Be a leader Rocky Mt, be a hero.

Thank you for your attention to this matter,

Jan Wood
