To: psc@utah.gov

Commissioners,

We oppose any solar surcharge on our electric bill. Last April we gave Rocky Mtn Power 1821 kwhs of power, our excess solar generation. And that solar generation helped keep down the gunk on the front because we ran our wood stove almost not at all, and, of course, it put less CO2 in the atmosphere.

RMP and the public should be paying us for doing our part to clean up the environmental mess along the front and combatting climate change.

Respectfully,

Roz & Lee Badger,  
2616 Bonneville Ter  
Ogden, UT 84403
