Dear Commissioners,

As a young student, I became an on-the-job cost estimator. Even I knew that an estimate is worthless without looking at all effecting factors.

RMC knows this. They do it all the time for internal business decisions. You can bet they did it in deciding to ask for acceptance of non-research about the impacts of solar generation. You can bet they know that a they are in a bad light if a real look at the question is performed.

Please due good research for the sake of your self-respect, the sake of the truth and for the lungs of our children.

Later in life, I did hospice care work for the dying. Do any of you know how bad death by emphasis is?
