Solar "penalty"

1 message

Good morning,

I wish to express my opinion in regards to the surcharge being proposed against rooftop solar owners and participants. It is unconscionable to think that a person trying to do good in this world would be penalized because they want to depend less on a company such as Rocky Mountain Power. I am not a solar owner at this time but I will be in the future. We are collectively looking for options to avoid the unnecessary option of burning coal and fuel at all times for power. There are better options and those options will come much more quickly when we don't penalize those who are working for what is right. Granted, the infrastructure and installed power lines need maintenance but that can easily be taken care of by those who wish to remain on "the grid". People before profits.

Thank you for your time.
