Dear Chairman LeVar,

Solar brings jobs to our sunny state, it also gives us energy choices. Rooftop solar benefits us all.

Sincerely,

Sharon Wendt

Dear Chairman LeVar,

With the current administrations war on coal consumers should be able to tap into any resources available including solar, In the near future we won't have enough power and won't be able to afford the utility rates .

Sincerely,

Gary Price

Dear Chairman LeVar,

Please Support rooftop solar in docket # 14-035-114. Rooftop solar and the benefits solar brings to Utah include:  
Solar Gives Consumers Energy Choice  
Don't Let Utah Be the First State to Eliminate Net Metering  
RMP Should Not Be Allowed to Levy Unpredictable Charges on Solar Customers  
Independent Studies Finds Solar Keeps Energy Rates Low  
Solar Brings Jobs to Our Sunny State

Sincerely,

John Gillham

Dear Sirs,

As I read that the Public Service Commission seeks public comments about costs and benefits of solar net-metering and as I consider it a very important subject I will shortly express my opinion.

I am for the solar energy. I would like every house to have solar panels. I think it is great when governments try to help the cause which is very important for the public health. I have the auto immune disease and I suffer a lot and I spend a lot of money on it although I know it has no cure. I cannot prove it but I and other people I know with similar strange illnesses consider it the consequence of the air pollution. Actually when I spend two days in the mountains or the air quality is green my symptoms almost disappear.

Please fight for your children's future, I am sure you do not want them to have terrible health problems.

I know that some people whose work is related to electrical power companies would lose their jobs, but that is normal in modern society, people cannot have the same job until they get retired, they have to learn new skills and find other jobs. If it were not this way we would still live in caves.

We have to preserve the nature as much as we can for everybody's benefit.

Thank you for giving us the opportunity to express our opinions.

Best regards

Branka Blazevic Pistalo (801-455-1987)

Dear Chairman LeVar,

Solar energy should be supported 100% by retaining the current energy strategy or improving it so that homeowners who invest in solar get fair remuneration for the energy produced by their investment. President Obama has noted that climate change is real, is man-made, and needs to be addressed now or the ability of future generations to address it effectively will become much harder or even impossible. Please view "Six Degrees", get updated on the climate change issues and respond to them by endorsing the reasonable support of homeowner-generated electric power.

Sincerely,

Martin Willcocks
