RE: Docket Number: 14-035-114 (and all dockets affecting the *public*):TO: The *Public Service Commission* and Gary Widerburg, PSC Commission Secretary

I am concerned about how the PSC is handling letters and emails from the very members of the *public* that the commission is meant to represent and serve. Please allow me to suggest that the PSC revert back to posting *individual* submissions on all of its dockets, including on **Docket Number: 14-035-114**. There is tremendous public interest in the issues the PSC considers and I believe that periodically posting only a non-searchable PDF compilation of recently received individual submissions falsely represents the degree of public concern about these matters (in addition to not providing interested readers with certain information included in the submissions, such as hyperlinks to information the PSC and other readers should consider). It is curious that Mr. Widerburg's reply to Mike and Laurie Madsen would be posted separately on **Docket Number: 14-035-114**, while other letters and emails are not accorded equal standing.

Moreover, the public's submissions regarding **Docket Number 13-035-184** also should be posted **Docket Number: 14-035-114** as the latter docket essentially is a continuation of the former. By excluding these earlier comments from **Docket Number: 14-035-114**, the PSC not only appears to undervalue the public's views on matters of tremendous societal, environmental, and economic import, but it essentially is requiring numerous individuals and organizations to recontact the PSC in order to repeat their standpoints.

Thank you sincerely for your consideration,  
Tamara J. Ferguson

Dear Chairman LeVar,

Please support policies that encourage solar energy. This includes not charging fees to solar customers, and investing in solar technology for the whole state.

In a state that struggles to have clean air, reliance on coal plants is outdated and unhealthy. Coal is a limited resource, while solar is renewable. Solar power also attracts jobs in the growing green sector. Finally, solar power allows Utahns a choice in their energy providers.

Please allow citizens of this state the opportunity for cleaner and more sustainable energy choices. Please support solar.

Sincerely,

Marianne Nolte

Dear Chairman LeVar,

I no longer make enough money to install Solar as it stands. I do intend to move my home to Solar (if not completely, then mostly) in the future. By supporting Docket 14-035-114, it will secure my future in moving to a cleaner more affordable method of powering my home for me and my family.

I understand that moving to Solar makes Rocky Mountain Power apprehensive about the future of their company, but it also secures my family's future. Putting food on the table, clothes on my kids and paying for college in the not to far off future.

Every little bit helps, and letting the already very profitable utility companies continue to charge and change charges when we as customers shop around (for example; installing solar or wind power on our homes), makes growth as an individual difficult if not impossible in some cases (for instance, my income dropped substantially when I retired, my power bills are now a large part of my budget).

Thank you for your consideration,

Sincerely,

Justin Steiger

Dear Chairman LeVar,

Eliminating net metering is anti-consumer and should not be considered as good policy.

Rooftop solar provides consumers choices in energy.

Rooftop solar creates local Utah jobs.

Rooftop solar provides for these things today, not in a gradual and unpredictable future transition envisioned by RMP.

Support us as consumers by denying the request to eliminate net metering and any future moves to eliminate choices and jobs in Utah.

Sincerely,

Brad Midgley
