Dear Commissioner White,

As a recent installer of rooftop solar panels on my home in Bountiful I would hope that the PSC would continue to support net metering for other users.

While I understand the difficulties involved with maintaining the grid, ending support for net metering is absolutely the wrong move.

Increasing fees on solar users is punishing those of us who are trying to do the right thing for their communities and neighbors.

Solar now employs more than twice the number of people as the coal industry in the United States. Rather than continue to prop up a dying industry we should be focusing on increasing solar jobs in one of the sunniest places in the country.

Sincerely,

Jonathan Marsh
